

The Paint Bucket

FlipPad paints below the lines to make the lines blend better with and the paint and the background.

- Tap the Bucket icon and select a color to paint
- Tap inside the lines to fill the area with paint
- Drag the Bucket like a brush to easily fill adjacent areas
- Touch & hold to AutoFill the rest of the empty areas
- Touch & hold the bucket icon for more painting options
- AutoFill Level fills all objects in all frames automatically
- AutoAdvance jumps to the next image as soon as you fill an area. This makes painting one thing through several cels twice as fast
- Adjust the Tolerance to fill beneath the lines correctly
