

Levels

Each level has 2 separate layers, ink (the lines) and paint (the colors). The background is on the right and the levels stack up to the left. So anything to the left in the xsheet will be in front of anything to the right.

The Level Dialog lets you name your levels as well as Lock and Hide levels.

You can also Add and Delete levels.

- Touch & Hold the label at the top of any level to open the dialog.
