

Welcome To DigiCel FlipPad for iPad, iPhone and Macs running Catalina or newer OS.

FlipPad is for people who like to draw and want to do Disney-style animation. It works the same way traditional animators have worked for the last 50 years and the same way the major studios and top animation schools do today. That's why the animators use FlipBook to make Looney Tunes: Back in Action, The Simpsons Movie and The Princess and the Frog.

Here are a few things to help you get the most out of FlipPad.
